Figure (a) shows the ocean surface albedo from 2001 to 2009, with two lines representing COVE and Nudged simulations. Figure (b) presents a comparison of ocean surface albedo for different models and years:

- **COVE**
  - LMDZ-old: R(LMDZ-old) = 0.074
  - ARPEGE-old: R(ARPEGE-old) = 0.188
  - LMDZ-new: R(LMDZ-new) = 0.396
  - ARPEGE-new: R(ARPEGE-new) = 0.375
